

PIECE BY PIECE, IT'S A
VALUABLE OFFER.

CONTRACT LEVELLING
AND LEVELLING TRIALS

THE SERVICES OFFERED BY KO

WHY DO YOU TRUST THE TECHNICAL MARKET LEADER FOR PART LEVELLING?

Because the Center for Competence in Levelling Technology makes you an offer that guarantees results at the highest level. And also provides your choice of additional services for the transportation of the parts that are to be levelled, as well as its expertise to accompany the process.

FULL SERVICE

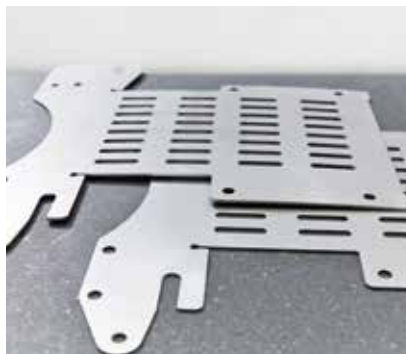

KOHLER completely redefines the entire process of contract levelling. In the full-service version, it also includes picking up the parts that are to be levelled. You save valuable time and thus also costs not only because you do not need to do the levelling yourself, but also because you place the transportation logistics in our hands.

EXPERT SERVICE

Besides our constantly high quality, our flexibility is one of the most important constants our customers can rely on. Consequently, in the expert version we offer the possibility for you to initiate the process yourself by delivering the parts to be levelled to us.

SELF SERVICE

Optimal solutions are always tailor-made solutions. That's why KOHLER always seeks to meet individual requirements by offering equally individual services. If it is more advantageous for you to take care of the delivery of the levelled material yourself, then our self-service version provides the freedom to do so.

LEVELLING BY KOHLER

— At its Center for Competence in Levelling Technology in Lahr, Germany, as well as its subsidiary in Shanghai, China, KOHLER provides optimal conditions for contract levelling and levelling trials.

KOHLER REDEFINE CONTRACT LEV

EXCLUSIVE EXPERTISE.

Thanks to its highly-qualified professionals, KOHLER has been able to develop the entire contract levelling process to perfection. If you choose the full-service version, you profit directly from this top quality – for example from the exclusive support of one of our levelling experts with all his knowledge and experience.

The levelling of parts is a very sensitive process. Particularly because the steadily increasing demands are bringing it closer and closer to the limits set by the laws of physics. So that no mistakes occur even under these extreme conditions, one of our highly specialized employees provides support in the expert-service version.

If you choose to manage yourself the levelling process as much as possible, we still won't just leave you completely on your own: of course, our inexpensive self-service version naturally also includes the precise set-up of the levelling machine by our specialists, so that your operating personnel can easily achieve first-class results.

PRECISION MACHINES FOR THE BEST RESULTS:

Roller diameter	Sheet thickness	Maximum width	Description
10 mm	0.15 – 1.25 mm	120 mm	Precision levelling machine
18 mm	0.1 – 2.0 mm	260 mm	Precision levelling machine
30 mm	0.2 – 3.0 mm	1250 mm	Electro-mechanical precision levelling machine
50 mm	0.5 – 11 mm	1500 mm	Electro-mechanical precision levelling machine
80 mm	1.0 – 23 mm	1850 mm	Electro-mechanical precision levelling machine
120 mm	2.0 – 32 mm	1850 mm	Electro-mechanical precision levelling machine

— Further details upon request

ELLING

EVERYBODY LIKES KOHLER.

Contract levelling with KOHLER always results in a happy ending. First, because of the precise results. Second, because we return the levelled parts to you in top shape, ready for you to further refine them and make great and successful products out of them.

For 360-degree customer satisfaction, more is necessary than just the measureable technical levelling success. For this reason, we supplement our leading technical expertise with a comprehensive range of service packages – and in the expert version, we also take care of the delivery so that the levelled parts are returned to you punctually.

KOHLER's customers know exactly what they want. It is not always our complete range of services. For example, you might want to come and pick up the levelled parts yourself. We offer this possibility in the inexpensive self-service version. Why? – Because you know best what is most beneficial for you.

PRECISION LEVELLING.

CONTRACT LEVELLING AND LEVELLING TRIALS AT THE HIGHEST LEVEL

Investing in a levelling system only makes sense where demand is sufficiently and consistently high. Until you reach that point, KOHLER performs the task for you through contract manufacturing with its highly precise and high performance part levelling systems.

In response to various trends in sheet-metal processing, the levelling of sheet metal parts is becoming increasingly important - and thankfully, KOHLER is a leading supplier of part levelling machines.

In practice, making a start on highly sensitive part levelling can be complex in the extreme; falling tolerance limits and ever growing demands on evenness call for professional technology and a great deal of know-how. If you're looking to overcome these difficulties, KOHLER is the ideal partner to contact. That's because from its Competence Center for Levelling Technology in Lahr and a branch in Shanghai, KOHLER offers you the best possible opportunities for contract levelling of sheet metal parts from 0.15 to 23 mm - quickly, flexibly, reliably and, of course, to unbeatable quality standards.

Beyond that, KOHLER invites you to perform levelling trials at its Competence Center. Come to visit us and see for yourself how that works! For example, you find out what conditions are best for levelling and how good the results are that you can achieve when working together with leading experts. This brochure will provide you full details of what KOHLER can do for you.
